Jl. Sukabirus No.92, Citeureup, Kec. Dayeuhkolot, Kabupaten Bandung, Jawa Barat 40257

SUMMARY

Fresh graduate Software Engineering with strong interest in backend development. Experienced in building REST APIs, handling data processing, and supporting frontend integration. Passionate about scalable systems and clean architecture.

WORK EXPERIENCES

Badan Pelaksana Otorita Danau Toba (Internship) Jul 2024 - Aug 2024

- Contributed to creating a website for managing data on tourist attractions at BPODT Caldera Resort using Codeigniter framework.
- Implemented an interactive maps feature on BPODT Caldera Resort's website with CodeIgniter, enhancing tourist navigation and experience.

HUMIC (Human Centric) Engineering Research Center (Internship) Feb 2024 - Jun 2024

- Contributed to developing the backend system of Symptosense (IoT-based patient monitoring app) using Laravel, improving system reliability for real-time data handling.
- Applied SCRUM methodology in team collaboration and project execution.

PROJECTS

- Symptosense – Web app for disease detection using AI based on input symptoms.
- Caldera Insight – Web app for tourists to access information about Caldera Toba.
- EduSkill – Web app for course registration and participant data management.
- My other projects – <https://github.com/Sayiki>

SKILLS

Soft Skills: Team work, Adaptability, Time management, Problem solving

Hard Skills: MySQL, Codeigniter, Laravel, PHP, CSS, Python, RESTful API, Postman, Java, C++, Flutter, C#

EDUCATION

Bachelor of Software Engineering, Telkom University Bandung Sep 2021 - Nov 2025
Undergraduate Software Engineering, 3.49/4.00

High School, SMA Sulthon Aulia Boarding School - Jakarta Timur, Indonesia July 2018 - May 2021
High School Diploma, Science Class (IPA), 83.28/100

ADDITIONAL INFORMATION

- Languages:** Indonesian, B2 English, Malay.
- Certifications:** Intellectual Property – Symptosense Project
